RESEARCH INTERESTS

My research applies machine learning to Earth observations for environmental monitoring and climate science applications. I specialize in computer vision, time series analysis, and natural language processing.

EDUCATION

MSc. Computer Science

University of Concepción (GPA: 6.1/7.0)

Concepción, Chile

Mar. 2017 – Oct. 2019

- Thesis: "Semi-supervised Adversarial Variational Domain Adaptation for Image Classification" (Grade: 7.0/7.0)
- Received Best Student Paper Award at Astroinformatics 2019 Conference, Caltech
- Research conducted at Harvard University's Institute for Applied Computational Sciences with Professors Guillermo Cabrera-Vives and Pavlos Protopapas

B.S. Industrial Engineering

University of Concepción (GPA: 5.9/7.0)

Concepción, Chile

Mar. 2013 – Sep. 2018

- Undergraduate honors thesis *Multiband galaxy morphologies for CLASH: A convolutional neural network transferred from CANDELS* published in *Publications of the Astronomical Society of the Pacific*
- Focus on data science, machine learning, and optimization

EXPERIENCE

SPARK Postbaccalaureate Research Fellow

Center for Astrophysics (CfA) | Harvard & Smithsonian

Cambridge, MA, USA

Sept. 2025 – Present

Working under Dr. Cecilia Garraffo (Director, AstroAI at CfA) and Dr. Xiong Liu (PI of TEMPO, SAO Lead of MethaneSAT).

- **MethaneSAT Mission – Atmospheric Remote Sensing:** Developed deep learning algorithms for methane plumes, clouds and cloud shadows segmentation in spectroscopic imagery from MethaneSAT and MethaneAIR airborne data.
- **TEMPO Mission – Atmospheric Remote Sensing:** Designing geometry-based labeling system and machine learning models for cloud and shadow detection using spectroscopic data from NASA's Tropospheric Emissions: Monitoring of Pollution (TEMPO) satellite.

Chief Technology Officer

Center for Data and Artificial Intelligence, University of Concepción

Concepción, Chile

Jul. 2019 – Aug. 2025

- **Deep-Hub Geospatial Platform for Precision Silviculture:** Co-architected cloud-native ML infrastructure for automated tree detection using multi-sensor aerial imagery. Developed and deployed scalable deep learning models (detection, segmentation, land cover classification) processing 300,000+ acres of forest plantations. Led technical team of 5 engineers. Platform spun off as commercial venture from School of Engineering. Published research in *International Journal of Digital Earth*.
- **ALeRCE Anomaly Detector – Astronomical Time Series Analysis:** Designed and implemented deep learning-based anomaly detection algorithms identifying rare transient events in real-time telescope data. Research published in *The Astronomical Journal*. Funded by Millennium Institute of Astrophysics.
- **NLP for Social Science – Large-Scale Text Analysis:** Led development of transformer-based NLP platform for analyzing 500,000+ citizen feedback responses during Chilean social outbreak. Implemented sentiment analysis and topic modeling techniques, providing data-driven insights for policymakers. Platform's statistical outputs informed Chilean constitutional drafting process. Worked with Chilean Ministry of Social Development and Family.

Research Assistant

Institute for Applied Computational Sciences, Harvard University

Cambridge, MA, USA

Dec. 2018 – May. 2021

- Conducted research on semi-supervised domain adaptation for image classification under Prof. Pavlos Protopapas (IACS Scientific Program Director). Developed novel contrastive learning framework (Con²DA) for domain adaptation, published at NeurIPS 2020 Workshop on Distribution Shifts.
- Master's thesis research on adversarial variational domain adaptation. Recipient of IACS financial support (stipend and travel funding) for research development.
- Applied deep learning methods to astronomical image classification problems, transferring network knowledge across different telescope surveys and observing conditions.

CONFERENCE PRESENTATIONS

- ICLR 2026:** 4th ICLR Workshop on Machine Learning for Remote Sensing - Accepted Poster. [Link](#)
- AAAI 2026:** Workshop on AI to Accelerate Science and Engineering - Accepted Poster. [Link](#)
- AGU 2025:** AI-Driven Innovations in Earth and Atmospheric Sciences - Poster Presentation. [Link](#)
- NeurIPS 2025:** Climate Change ML Workshop – Poster Presenter. [Link](#)
- NeurIPS 2023:** Climate Change ML Workshop – Poster Presenter. [Link](#)
- ICML 2023:** Machine Learning for Astrophysics Workshop – (3) Poster Presentations. [Link 1](#), [Link 2](#), [Link 3](#)
- NeurIPS 2021:** Workshop on Distribution Shifts – Poster Presenter. [Link](#)
- Astroinformatics 2019:** Oral. Best Student Paper Award, Caltech. [Link](#)

TEACHING EXPERIENCE

- Lecturer** Concepción, Chile
School of Engineering, University of Concepción *Jul. 2019 – Present*
- Taught graduate and undergraduate courses including Deep Learning (2022-2024), Introduction to Data Science (2021-2022), Machine Learning (2019-2020), and Data Analysis (2024). Co-designed curriculum, lectures, and assessments for classes of ~30 students. Worked with professor Guillermo Cabrera-Vives.
 - Topics covered: supervised/unsupervised learning, cross-validation, convolutional neural networks, recurrent architectures, transformers, computer vision, NLP and time series analysis.
- Teaching Fellow** Cambridge, MA, USA
Institute for Applied Computational Sciences, Harvard University *Feb. 2019 – May 2019*
- Teaching fellow for CS109b: Advanced Topics in Data Science, course for the Data Science Master's program. Conducted office hours, graded assessments, and mentored students on ML projects under Prof. Pavlos Protopapas.

HONORS & AWARDS

- SPARK Postbaccalaureate Fellowship, Center for Astrophysics | Harvard & Smithsonian (2025)
- Visiting Professor, Master in Data Science for Innovation at University of Concepción (2023-2025)
- Best Student Paper Award, Astroinformatics 2019 Conference, Caltech
- Harvard-Chile Research Internship, Institute for Applied Computational Sciences at Harvard University (2018-2019)
- UdeC Scholarship for Master studies (2017-2019)

MENTORSHIP AND SERVICE

- AstroAI/EarthAI:** Affiliate, Center for Astrophysics | Harvard & Smithsonian (2023-2026).
- NeurIPS 2024:** LatinX in AI Workshop – Finance/Sponsorship Co-Chair
- Master in Data Science for Innovation at UdeC:** Mentored final graduation projects for 9 students.
- School of Engineering at UdeC:** Mentored undergraduate thesis projects for 6 students at Computer Sciences and Industrial Engineering Departments.
